

## Alkaline Batteries in Double Cabinet with shelves and stainless steel trays for fluid retention

- Prepared for 90 cells of alkaline battery up to 210Ah/10h
- Cabinet with natural cooling and proper treatment
- Access to all of the components that integrate the system
- Easy viewing of the electrolyte level in each element
- All Wiring with fireproof cables
- Fixed shelves in stainless steel with draining of liquids
- Two removable trays in stainless steel for fluid retention
- Battery protection by circuit breaker with opening information
- Temperature probe
- Gas measuring device (optional)
- Power terminals strip and Teleinformation
- Warranty of 2 to 5 Years
- CE Marking

### Application

- Medium Voltage Substations / Distribution
- Medium and High Voltage Eolic Farms Substations
- Energy producing Centrals
- Industrial Application
