

Batteries Cabinet of high capacity with removable shelves and stainless steel fluid retention tray

- Prepared for sets of Batteries of: 12V/24/48V or 110V
- Cabinet with Natural cooling and normalized treatment
- Placement of various types and constructions of battery elements
- Output Terminals, Tele-signaling and Temperature probe
- Protections by Circuit Bracker and disconnect switch w/ telesignaling
- Temperatura probe incorporated with information for the System
- Wiring with fireproof cables free of halogens
- Movable shelves with charge capacity of up to 300Kg without deformation
- Removable shelves with fluid routing
- Stainless Steel shelf with fluid retention
- Footer for easy transport and handling
- Warranty of 2 to 5 Years
- CE Marking

Application

- Medium Voltage Substations / Distribution
- High Capacity Installations/ Transport
- Energy producing Centrals
- Telephone switches / repeaters / Telecommunications
